

D2AI 2026

Data & Database Systems for Modern AI

November 12, 2026

Shenyang, China

Objective

D2AI 2026 is an international workshop on data and database systems for modern AI, focusing on scalable and trustworthy infrastructures for next-generation AI applications.

Scope of Topics

- Data and database systems for LLMs, agents, and RAG pipelines
- Integration of vector, relational, and graph data systems
- AI-accelerated query processing and learned database components
- Data governance, provenance, quality, and trust in AI systems
- Knowledge-enhanced data systems
- Quantum computing, quantum databases, and emerging data technologies for AI
- Benchmarks, workloads, and real-world deployment experiences for AI systems

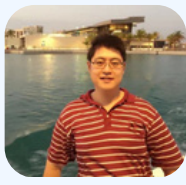

Important Dates

Paper Submission Due	Notification of Acceptance	Camera Ready Day	Workshop Date
August 20, 2026	September 20 2026	October 5, 2026	November 12, 2026

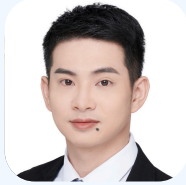

Organizers

Zhengyi Yang
The University of Sydney

Guanfeng Liu
Macquarie University

Qingqiang Sun
Great Bay University
